

## **The "FIRST Response Box"!**

*Imagine that the above*

**MARBOOM - "FIRST Response Box"**, (also available in various bulk and pallet plastic containers), holds between 1,300 – 2,600 ft. (400 - 800 meter) of Boom, equivalent to 550 – 350 ft. /10 cub. ft. (600 - 400 meter/m<sup>3</sup>).

- Minimal space is required to stow a large supply onboard any vessel for an immediate FIRST Response.
- Making the MARBOOM "FIRST Response" easy to handle, practical to stow and provides favorable transportation costs.
- The long length of MARBOOM can easily be cut to any length required, as the remainder stays stowed in the "FIRST Response Box".
- The boom and all packaging materials are 100% recyclable.

**Be ready with the MARBOOM "FIRST Response" Program!**
