

AIR BLOWER

Air blowers free standing (backpack) or handheld blowers are needed to inflate MARBOOM "FIRST Response" booms, or from other air sources as compressed air, exhaust gas can be used.

We offer only the latest models available, similar to the 2 blowers below but better, with high quality and they come with service possibilities worldwide.

All Air Pumps come with a see through Fuel-Tank, a Diaphragm w/Purge Pump Carburetor and a Pro-Fire® Electronic Ignition System with a 2 year Commercial Warranty.

We do recommend backpack blowers as these have higher air capacity. The air-blower fits into the opening of the air distribution channel in the sboom, which has a diameter of ~3 1/4" (8.2cm).

Specifications:

Model	Length without Pipe	Width	Height	Dry Weight	Cylinder volume	Fuel Capacity	Air Volume pipe average	Air Volume housing** average	Max. Air Speed pipe*
