

Various Carton BOXES

MARBOOM is packed in standard 2-ply carton boxes for small quantities. For larger quantities 3-ply carton boxes are used. Smallest possible packaging unit will always be used for ordered quantity, making it handy, practical and favorable to transport.

All box packed booms are ribbon-packed in an additional PE-bag.

Weather resistant, pallet boxes and containers are available, ideal for storage outside and on deck of a vessel.

A great feature with MARBOOM is that long boom lengths fits in small packaging units, 1,300'-1,950' /35 cub ft. (400- 600 meter/ m3). The weight of the boom including a ¼" chain is approximately 0.7 Lb/ft. (1.05 kg/mtr.).

The "FIRST Response Box"!

Imagine that the above

MARBOOM - "FIRST Response Box," (also available in various bulk and pallet plastic containers), holds between 1,300 – 2,600 ft. (400 - 800 meter) of Boom, equivalent to 550 – 350 ft. /10 Cub. ft. (600 - 400 meter/m3).

- Minimal space is required to stow a large supply on-board any vessel for an immediate first response.
- Making the MARBOOM: "FIRST Response" easy to handle, practical to stow and provides favorable transportation costs.
- The long length of MARBOOM can easily be cut to any length required, as the remainder stays stowed in the "FIRST Response Box".
- The boom and all packaging materials are 100% recyclable.

Various Corrugated Carton Boxes.

Following shows available standard Tri-ply Carton Boxes showing approximate volume and length of boom it can contain in American Standard and Metric.

Tri-Ply Carton Boxes					
Boxes (inch)	cub ft.	Approx. boom length feet.	Boxes (cm)	m3.	Approx. boom length meter.
24x24x24	8.0	410	61x61x61	0.23	125
30x30x30	15.5	794	76x76x76	0.44	242
40x30x30	20.5	1041	102x76x76	0.58	319
