

UV- Chart

This map illustrates the intensity of the UV-rays, world wide, measured in Langley. The further north and south of the equator the longer life time span of the booms can be expected.

The estimated life span for black MARBOOMs is 2 years and 6 months for the yellow material when used in tropical waters. An unopened air tight box can be stored for at least 10 years.

World map of UV zones.

**Example: Scandinavia has ~ 70 Langley, Florida 140.
In desert areas is 220 Langley measured (highest).**

**MARBOOM is UV stabilized for
long lasting tropical use.**
